

[illegible]

```

classDiagram
    class Component {
        Component
        Component
    }
    class Activity {
        Component
        Component
    }
    Component <|-- Activity
  
```

The diagram illustrates the structure of the 'Component' and 'Activity' classes. The 'Component' class is a base class for 'Activity'. The 'Component' class has a 'Component' attribute and a 'Component' method. The 'Activity' class has a 'Component' attribute and a 'Component' method. The 'Component' class is a base class for 'Activity'.
